

Federico Cocco

✉ federicocdev@gmail.com 📍 London, UK 🐙 fredc0088 🌐 fcocco

Summary

Senior Software Engineer with over seven years of experience architecting high-performance backend systems, specializing in the Scala/JVM ecosystem and functional programming.

Education

Birkbeck College, University of London , Computing	London, UK
• Software and Programming (Java, Scala, JavaScript and PHP) • Algorithm and Data Structures • Networks, Information Security, Website Design • Database Management, IT laws, Machine learning and AI basic theory • Final Project: Intelligent Documents Organiser Platform	2015 – 2018

Experience

The Walt Disney Company , Software Engineer (Backend, Scala)	London, UK
• Led technical delivery of OIDC Provider service, including entitlement distribution and PII protection. • Drove migration of core account services to modern functional Scala stacks (Http4s, Circe). • Designed reactive, event-driven solutions for compliance data deletion. • Refactored Terraform modules into reusable components for streamlined infrastructure.	Sept 2022 – present 3 years 9 months
Sainsbury's , Software Engineer (Backend, Scala)	London, UK
• Developed Pricing systems for group-wide metadata delivery using functional programming. • Created framework of reusable components for multi-services development and deployment.	Aug 2020 – Aug 2022 2 years 1 month
BBC , Software Engineer (Backend)	London, UK
• Built and maintained the BBC Sounds app backend serving millions of users. • Developed reliable Scala microservices using Akka and Docker. • Implemented robust infrastructures in AWS, including Java-based Lambdas.	July 2018 – Aug 2020 2 years 2 months
Ticketmaster , DevOps & Software Engineer (Internship)	London, UK
• Developed testing coverage dashboards with React, Node, and F#. • Managed Windows server infrastructure and AWS migration initiatives. • Automated transaction processes and database queries using PowerShell.	Sept 2016 – Dec 2017 1 year 4 months
